Notes to accompany Los Helados Mineral Resource table

1. Mineral Resource estimate has an effective date of April 26, 2019. The Qualified Person for the estimate is Mr. Gino Zandonai, RM CMC.
2. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability
3. Mineral Resources are reported using a copper equivalent (CuEq) cutoff grade. Copper equivalent is calculated using US\$3.00/lb copper, US\$1,300/oz gold and US\$23/oz Ag, and includes a provision for selling costs and metallurgical recoveries corresponding to three zones defined by depth below surface. The formulas used are: $CuEq\% = Cu\% + 0.6264 \cdot Au (g/t) + 0.0047 \cdot Ag (g/t)$ for the Upper Zone (surface to ~ 250 m); $Cu\% + 0.6366 \cdot Au (g/t) + 0.0077 \cdot Ag (g/t)$ for the Intermediate Zone (~250 m to ~600 m); $Cu\% + 0.6337 \cdot Au (g/t) + 0.0096 \cdot Ag (g/t)$ for the Deep Zone (> ~600 m)
4. Cutoff grades refer to diluted cutoff grades used to generate the corresponding block cave shapes. For each cutoff grade, the tonnes and grade represent the total Indicated or Inferred undiluted material within each of these shapes.
5. Mineral Resources are reported within block cave underground mining shapes based on diluted CuEq grades, US\$13.07/t operating costs and include a provision for capital expenditure. The base case cutoff grade of 0.33% CuEq was derived through an economic evaluation of several block cave shapes developed over a range of different cutoff grades and is the cutoff grade which results in a zero net present value
6. Totals may not sum due to rounding as required by reporting guidelines
