Cautionary Statement

Certain statements made and information contained herein in the presentation constitutes “forward-looking information” and “forward-looking statements” within the meaning of applicable securities legislation (collectively, “forward-looking information”). The forward-looking information contained in this presentation is based on information available to the company as of the date of this presentation. Except as required under applicable securities legislation, the company does not intend, and does not assume any obligation, to update this forward-looking information. Generally, this forward-looking information can frequently, but not always, be identified by use of forward-looking terminology such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", “targets”, "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or statements that certain actions, events, conditions or results “will”, "may", "could", “should”, "would", "might" or "will be taken", "occur" or "be achieved" or the negative connotations thereof. All statements other than statements of historical fact may be forward-looking statements.

By their nature, forward-looking statements involve assumptions, inherent risks and uncertainties, many of which are difficult to predict, and are usually beyond the control of management, that could cause actual results to be materially different from those expressed by these forward-looking. NGEX Minerals believes that the expectations reflected in these forward-looking statements are reasonable as of the date made, but no assurance can be given that these expectations will prove to be correct. In particular, forward-looking statements contained in this presentation include all statements regarding, 2026 Objectives, potential exploration upside at Lunahuasi, Predictive Discovery, RIGI Application, permitting and constructing an adit, timing, goals and objectives for Phase 4 drill program at Lunahuasi, ability to: complete planned program; achieve timelines set out in Royalty section, generate future shareholder returns; realize optionality and synergies in District,. Information concerning mineral resource estimates are also forward-looking statements in that they reflect a prediction of the mineralization that would be encountered, and the results of mining, if a mineral deposit were developed and mined, the nature, scope and timing of the work to be undertaken to advance the Companies projects. While the Company anticipates continuing its drill program until May, it may encounter unexpected drilling and other challenges, costs, or delays that could prevent the Company from completing the program on the expected timeline or at all. Any drilling next season is dependent on pending results from this year’s program. This program could be delayed or not be carried out at all. Although NGEX Minerals believes that the expectations reflected in such forward-looking statements and/or information are reasonable, undue reliance should not be placed on forward-looking statements since NGEX Minerals can give no assurance that such expectations will prove to be correct. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements, including the risks, uncertainties and other factors identified in NGEX Minerals periodic filings with Canadian securities regulators, available under the Company’s SEDAR+ profile at www.sedarplus.ca.

These factors are not, and should not be construed as being, exhaustive. Although the company has attempted to identify important factors that would cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated, estimated, or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. All of the forward-looking information contained in this document is qualified by these cautionary statements. Readers are cautioned not to place undue reliance on forward-looking information due to the inherent uncertainty thereof.

Estimates of Mineral Reserves and Mineral Resources

Information regarding reserve and resource estimates has been prepared in accordance with Canadian standards under applicable Canadian securities laws and may not be comparable to similar information for United States companies. The terms “Mineral Resource”, “Measured Mineral Resource”, “Indicated Mineral Resource” and “Inferred Mineral Resource” used in this presentation are Canadian mining terms as defined in accordance with NI 43-101 under guidelines set out in the Canadian Institute of Mining, Metallurgy and Petroleum (“CIM”) Standards on Mineral Resources and Mineral Reserves adopted by the CIM Council on May 10, 2014. While the terms “Mineral Resource”, “Measured Mineral Resource”, “Indicated Mineral Resource” and “Inferred Mineral Resource” are recognized and required by Canadian regulations, they are not defined terms under standards of the United States Securities and Exchange Commission. Under United States standards, mineralization may not be classified as a “reserve” unless the determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve calculation is made. As such, certain information contained in this presentation concerning descriptions of mineralization and resources under Canadian standards is not comparable to similar information made public by United States companies subject to the reporting and disclosure requirements of the United States Securities and Exchange Commission. An “Inferred Mineral Resource” has a great amount of uncertainty as to its existence and as to its economic and legal feasibility. It cannot be assumed that all or any part of an “Inferred Mineral Resource” will ever be upgraded to a higher category. Under Canadian rules, estimates of Inferred Mineral Resources may not form the basis of feasibility or other economic studies. Readers are cautioned not to assume that all or any part of Measured or Indicated Resources will ever be converted into Mineral Reserves. Readers are also cautioned not to assume that all or any part of an “Inferred Mineral Resource” exists or is economically or legally mineable. In addition, the definitions of “Proven Mineral Reserves” and “Probable Mineral Reserves” under CIM standards differ in certain respects from the standards of the United States Securities and Exchange Commission. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.

Qualified Persons

The disclosure of scientific and technical information regarding the Company’s properties in this presentation was prepared by or reviewed Bob Carmichael, B.A.Sc., P.Eng., who is the Qualified Person as defined by NI 43-101. Mr. Carmichael is Vice President, Exploration for the Company.

Technical Reports

For details on data verification, sample, analytical and testing results and further details regarding methods used to estimate mineral reserves in respect of the Los Helados project, refer to the technical report titled “Technical Report on the Los Helados Project, Chile and Argentina” dated August 22, 2025 (effective date July 29, 2025), which incorporates the mineral resources statement for Los Helados. For the Lunahuasi project refer to the “Technical Report on the Lunahuasi Project, Argentina dated August 22, 2025 (effective date August 8, 2025). Both reports are available on the Company’s website and SEDAR+.

Copper Equivalent Calculations

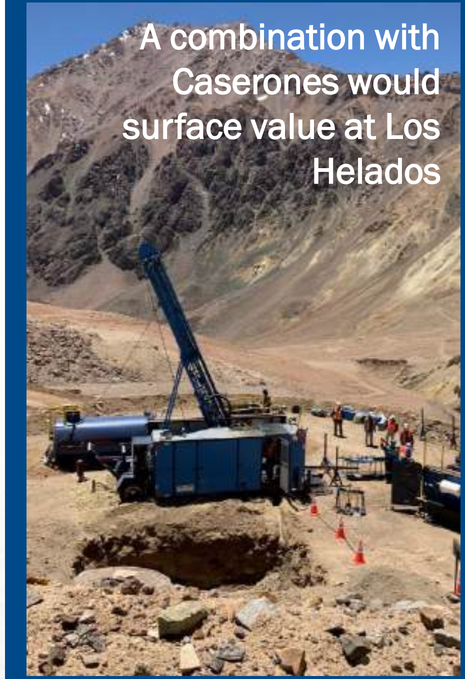
Copper equivalent for Lunahuasi drill intersections is calculated based on US$3.00/lb Cu, US$1,500/oz Au and US$18/oz Ag, with 80% metallurgical recoveries assumed for all metals. The formula is: CuEq % = Cu % + (0.7292 * Au g/t) + (0.0088 * Ag g/t). For Los Helados copper equivalent (“CuEq”) formula see Los Helados Resource Statement

NGEx is the last piece of the Vicuña puzzle

Strongly positioned to create shareholder value in one of the most prospective copper-gold districts in the world

Lunahuasi Phase 4 is now complete - building a pathway to stand-alone development

A combination with Caserones would surface value at Los Helados



Presence of Major in district gives credibility

Stake in LunR is a valuable asset and potential source of future funding

LUNR ROYALTIES

Portfolio of two valuable assets

Located in the rapidly advancing Vicuña District

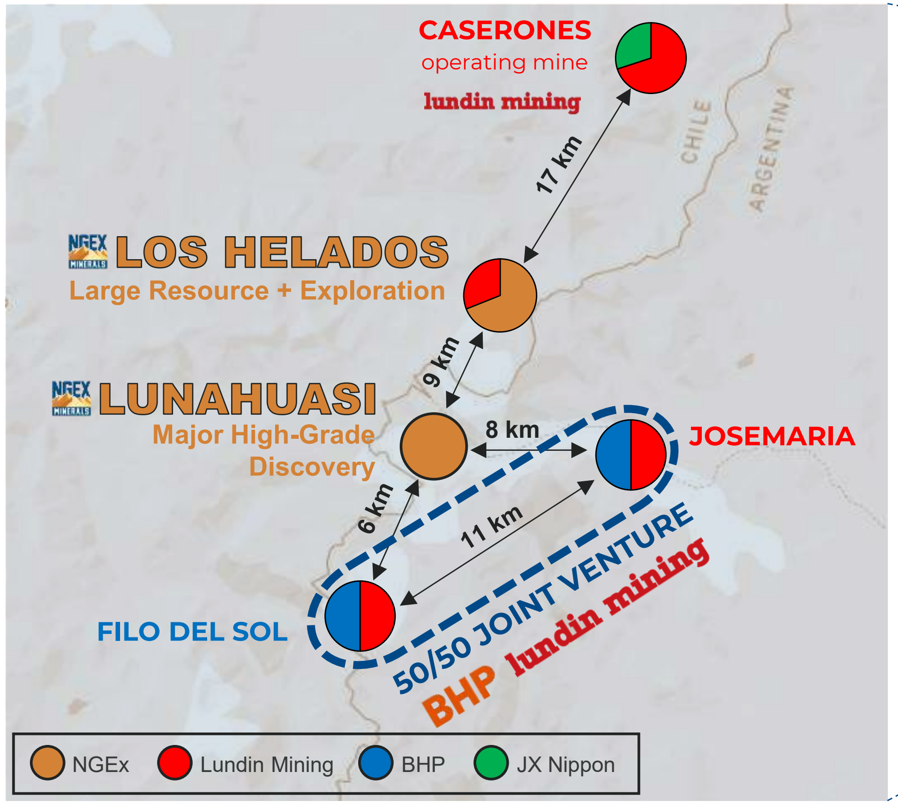
Lunahuasi | San Juan, Argentina

HIGH-GRADE COPPER-GOLD-SILVER DISCOVERY

Los Helados | Region III, Chile

ONE OF THE LARGEST UNDEVELOPED COPPER-GOLD PROJECTS GLOBALLY

The last way to attain exploration leverage in the Vicuña District



Lunahuasi | An Emerging Giant

Lunahausi is unique in the Vicuña District

Lunahuasi has multiple overprinting styles of mineralization

GRADE + SCALE + GOLD

GRADE

Cu-Au-Ag high-sulphidation veins

Hole 14:
9.4m at **40.12%** CuEq
(27.68% Cu, 14.13 g/t Au, 242.4 g/t Ag)

Hole 28:
51.1m at **13.84%** CuEq
(5.98% Cu, 9.70 g/t Au, 90.4 g/t Ag)

Hole 32:
27.4m at **25.19%** CuEq
(7.80% Cu, 23.17 g/t Au, 55.9 g/t Ag)

Hole 54:
21.7m at **31.92%** CuEq
(12.70% Cu, 25.21 g/t Au, 95.5 g/t Ag)

SCALE

Cu-Au porphyry with high-sulphidation overprint

Hole 22:
726.5m at 1.66% CuEq
(0.89% Cu, 0.88 g/t Au, 14.5 g/t Ag)

Hole 27:
1,619.4m at **0.87%** CuEq
(0.52% Cu, 0.32 g/t Au, 13.2 g/t Ag)

Hole 29:
823.1m at **1.17%** CuEq
(0.84% Cu, 0.29 g/t Au, 12.8 g/t Ag)

Hole 64:
1,540.1m at **1.17%** CuEq
(0.79% Cu, 0.39 g/t Au, 11.3 g/t Ag)

GOLD

High-grade Au in quartz veins

Hole 35:
51.5m at **10.42 g/t** Au
(4.37% Cu, 10.42 g/t Au, 32.6 g/t Ag)

Hole 46:
104.8m at **14.74 g/t** Au
(2.97% Cu, 14.74 g/t Au, 65.0 g/t Ag)

Including, Hole 46:
61.9m at **23.81 g/t** Au
(1.91% Cu, 61.72 g/t Au, 20.0 g/t Ag)

Hole 70:
17.3m at **207.79 g/t** Au
(2.02% Cu, 207.79 g/t Au, 16.2 g/t Ag)

Part of a well-understood geological model

Deposit lies along same structural corridor as Filo del Sol and Los Helados

Lunahuasi continues to show significant upside

4 distinct styles of mineralization identified – deposit still open in all directions

70,567m Drilled Since Discovery

Phase 1: 4,912m
- DPDH001 – 008

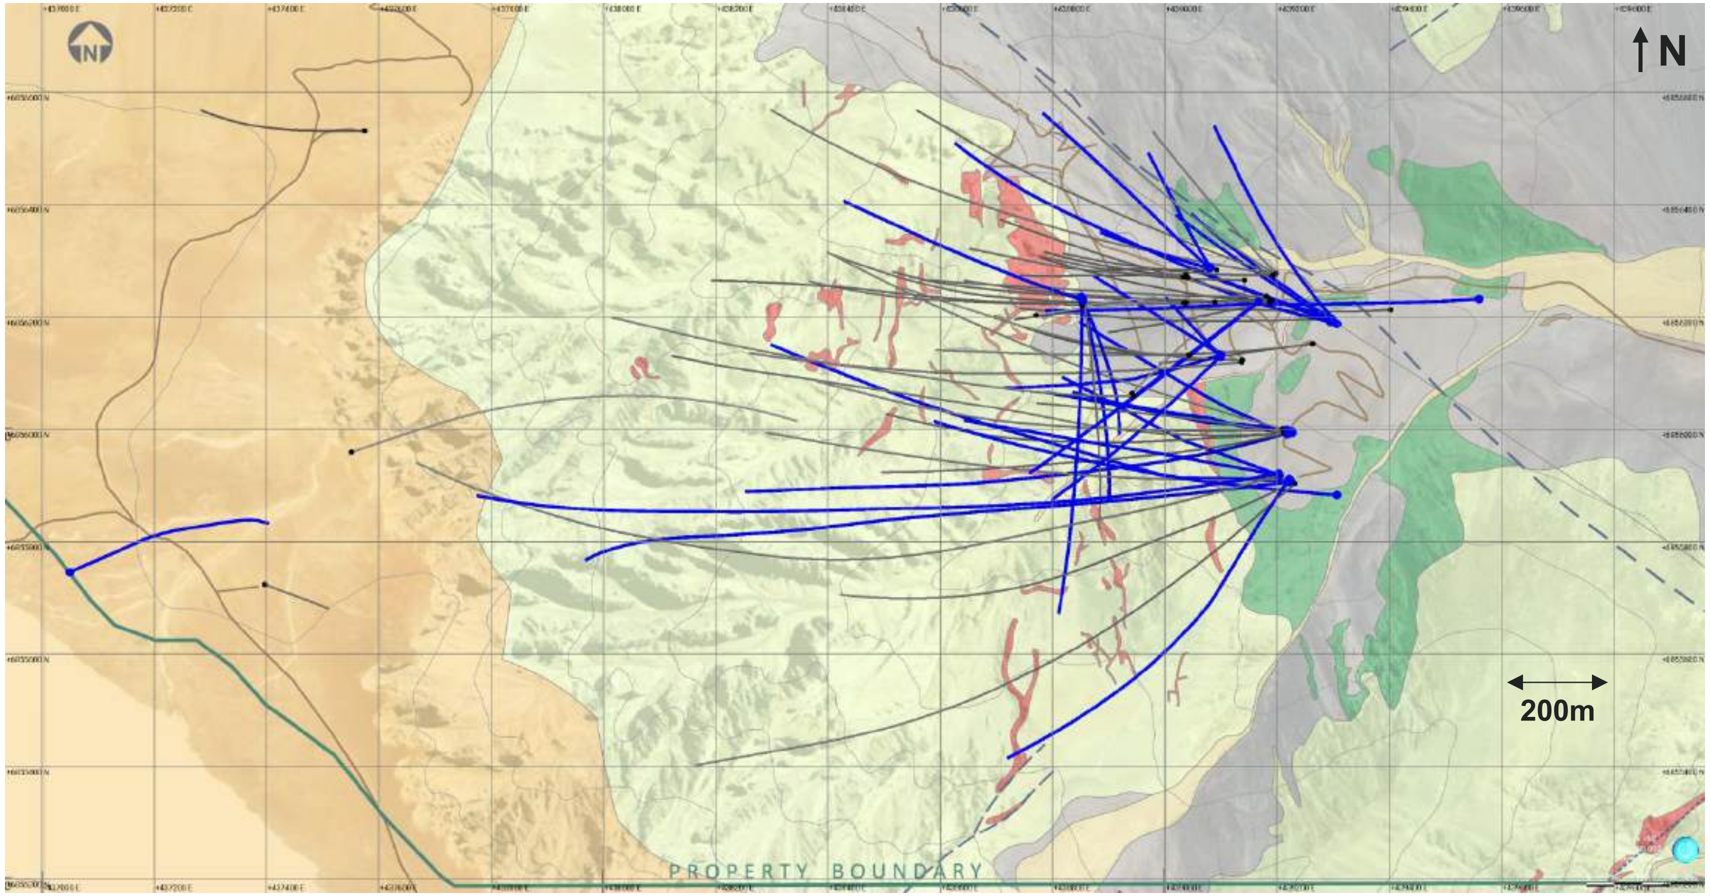
Phase 2: 12,950m
- DPDH009 – 023

Phase 3: 25,387m
- DPDH024 – 047

Phase 4: 27,318m
- DPDH048 – 078, DPGT004

4 distinct styles of mineralization

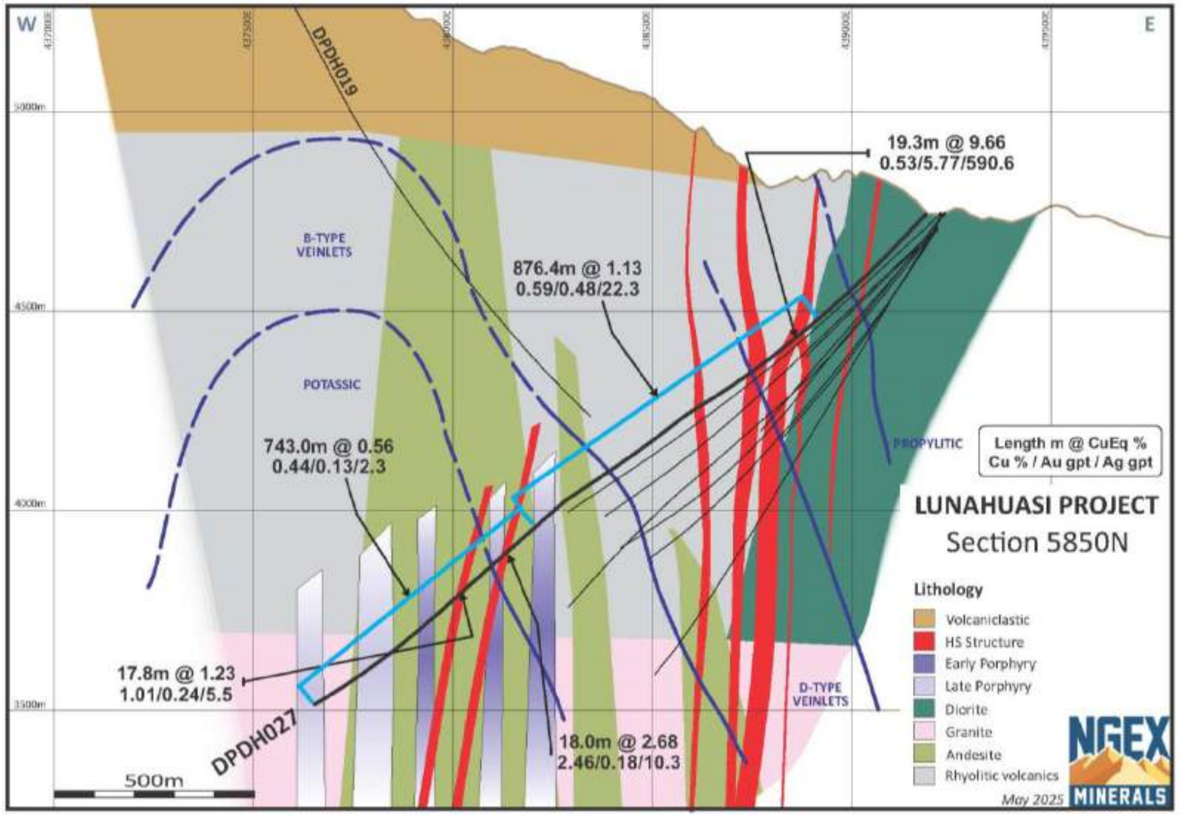
- Cu-Au-Ag high-sulphidation veins
- Cu-Au high-sulphidation stockwork and disseminated
- Cu-Au porphyry
- Ultra high-grade gold in quartz veins



Porphyry system and high-grade copper and gold veins discovered

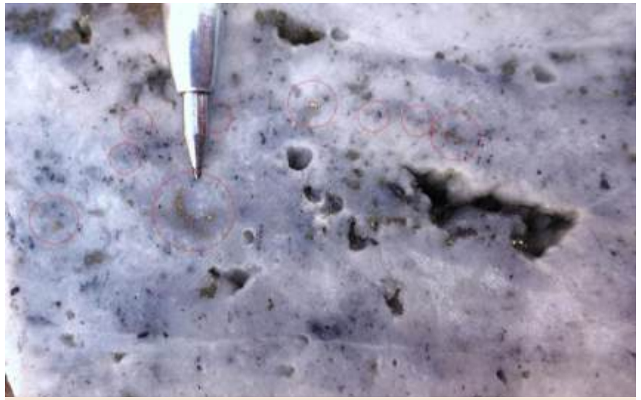
All unusually high-grade

High-grade high-sulfidation copper-gold mineralization part of a much larger porphyry related system



Bonanza grade gold veins cross-cut high-sulphidation mineralization

0.90m @ 25.00% Cu, **290.00 g/t Au**, 1,090.0 g/t Ag



1.55m @ 4.84% Cu, **504.00 g/t Au**, 90.00 g/t Ag

Phase 4 has improved confidence in, and expanded named zones

Phase 4 plan complete at Lunahuasi with a total of 27,318m drilled and 32 holes completed

Extension of existing zones and delineation of new zones

Saturn zone: continued expansion and consistent intersection of high-grades

Mars zone: outlining of a potentially very high-grade core within an expanding envelope

Jupiter zone: expansion and continued intersection of high-grades

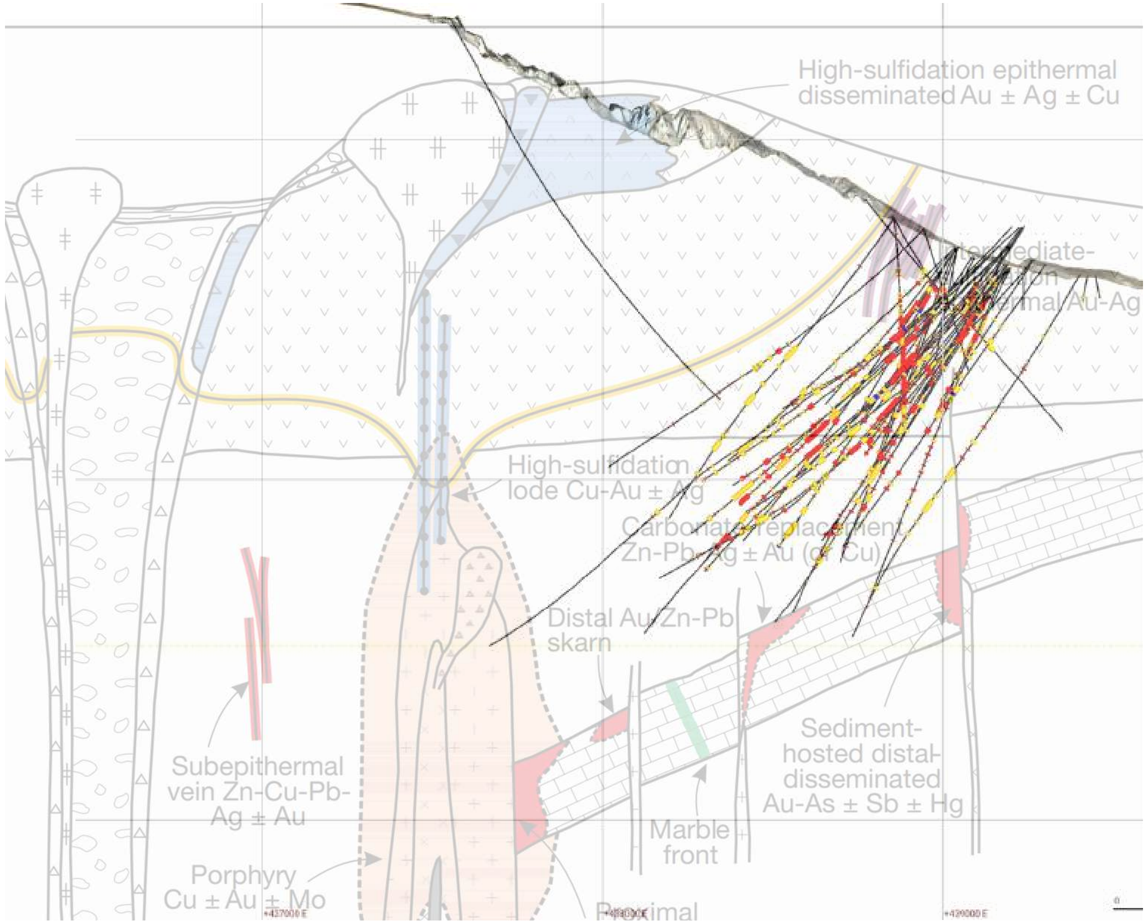
Continued intersection of high-grade gold quartz veins over a wide area

Confirmation that the Lunahuasi porphyry includes a large breccia body with significant copper and gold grades

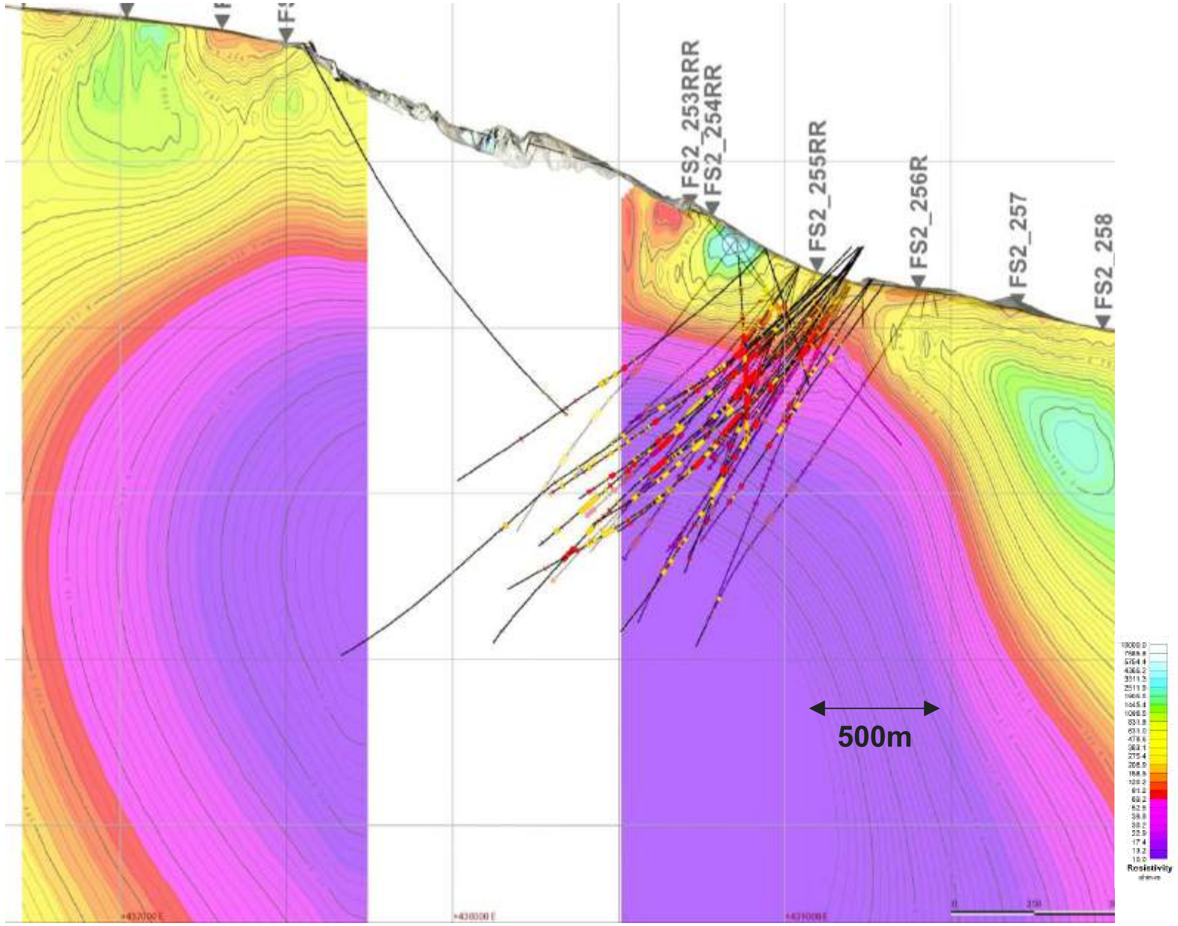
But we are still only scratching the surface

More drilling required to fully understand Lunahuasi

Drilling to date covers only a portion of the overall system



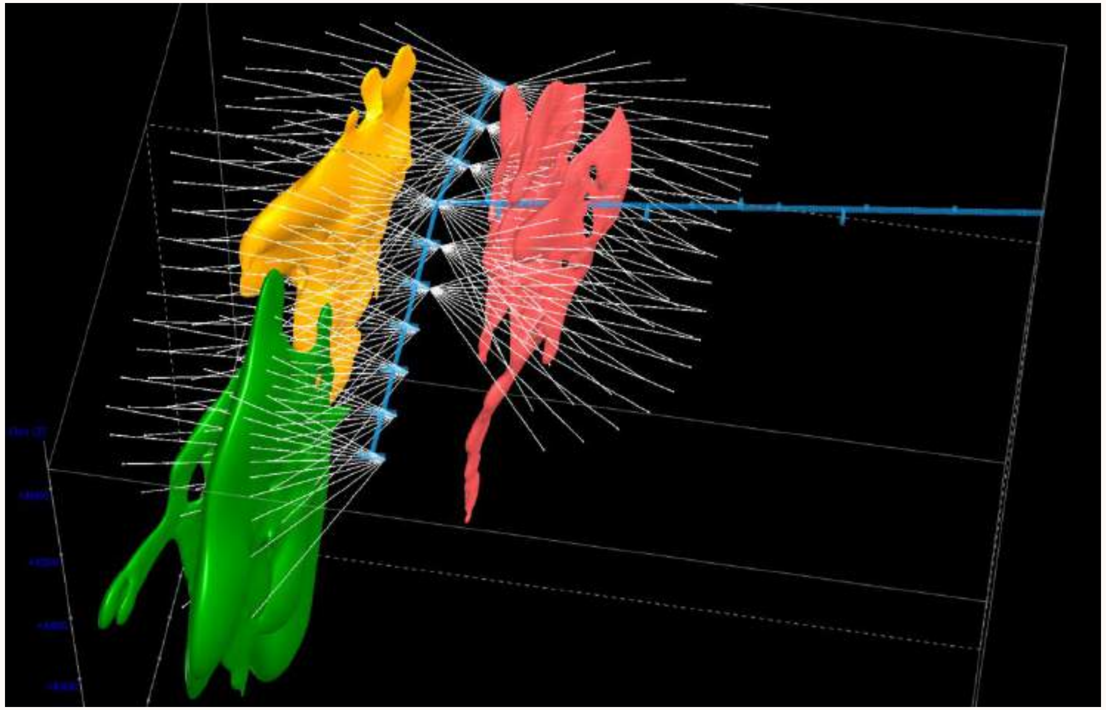
MT results highlights further potential



Fast tracking Lunahuasi towards development

Maximizing value generation by minimizing the timeline to production

Exploration adit (construction to start shortly)



EIA approved by the Mining Authority of San Juan. Targeting Q4 2026 to start underground development.

RIGI application (ongoing)

Selected key RIGI benefits

	General Regime (without RIGI)	With RIGI Benefits
Income Tax Rate	35%	25%
VAT Tax Credit	Long period for VAT credit during the construction phase. An estimated 16% of CAPEX	Granting of Tax Credit Certificate for VAT payment to VAT suppliers and VAT imports
Import Duties	Greater than 10%, subject to asset classification	0%
Access to the Foreign Exchange Market	Prior Authorizations of BCRA	No restrictions or prior authorizations
Dispute Resolution Mechanism	Argentine courts of general jurisdiction	Various options and jurisdictions would granted for dispute resolution (including international jurisdiction)

RIGI provides financial, economic and legal benefits to large capital projects

Los Helados | New partnership with Lundin Mining creates opportunity

Los Helados is one of the largest undeveloped deposits in Chile

Copper-gold porphyry deposit located in Region III, Chile

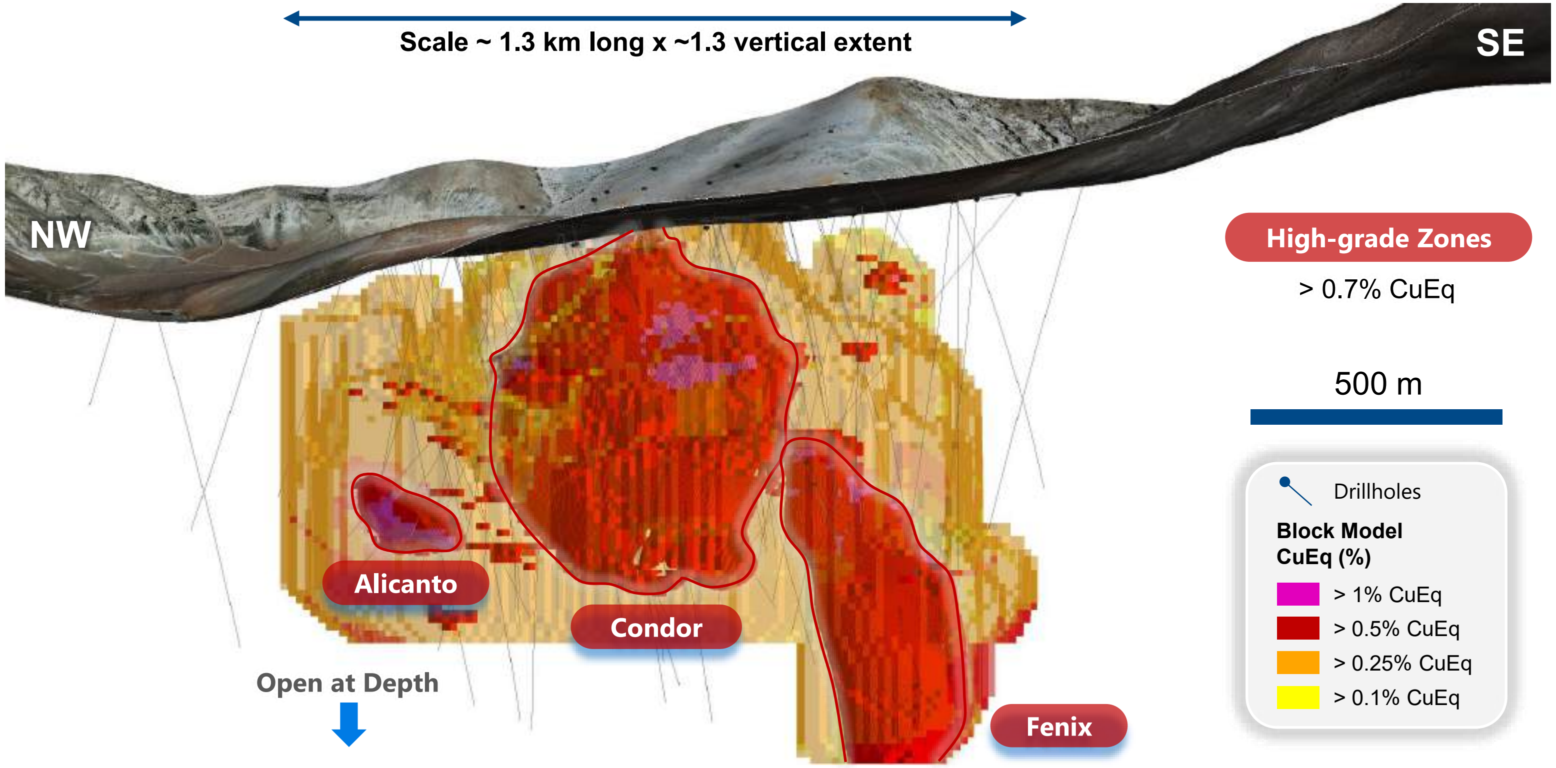
Snapshot

Ownership: ~69% owned and operated by NGEx, ~31% owned by Lundin Mining

Location: Region III, Chile - 17 km from Caserones mine (Lundin Mining 70%/JX Nippon 30%)

Historical Drilling: 93,750m across 106 diamond drill holes and significant historical engineering and metallurgical work completed

Resource: 18.4 Blbs Cu, 10.2 Moz Au and 97.5 Moz Ag Indicated Resource; 8.3 Blbs Cu, 3.6 Moz Au and 50.2 Moz Ag Inferred Resource



Cu (@ 0.33% Cut-Off)	Indicated	18.4 Blbs
	Inferred	8.3 Blbs
Au (@ 0.33% Cut-Off)	Indicated	10.2 Moz
	Inferred	3.6 Moz
Ag (@ 0.33% Cut-Off)	Indicated	97.5 Moz
	Inferred	50.2 Moz

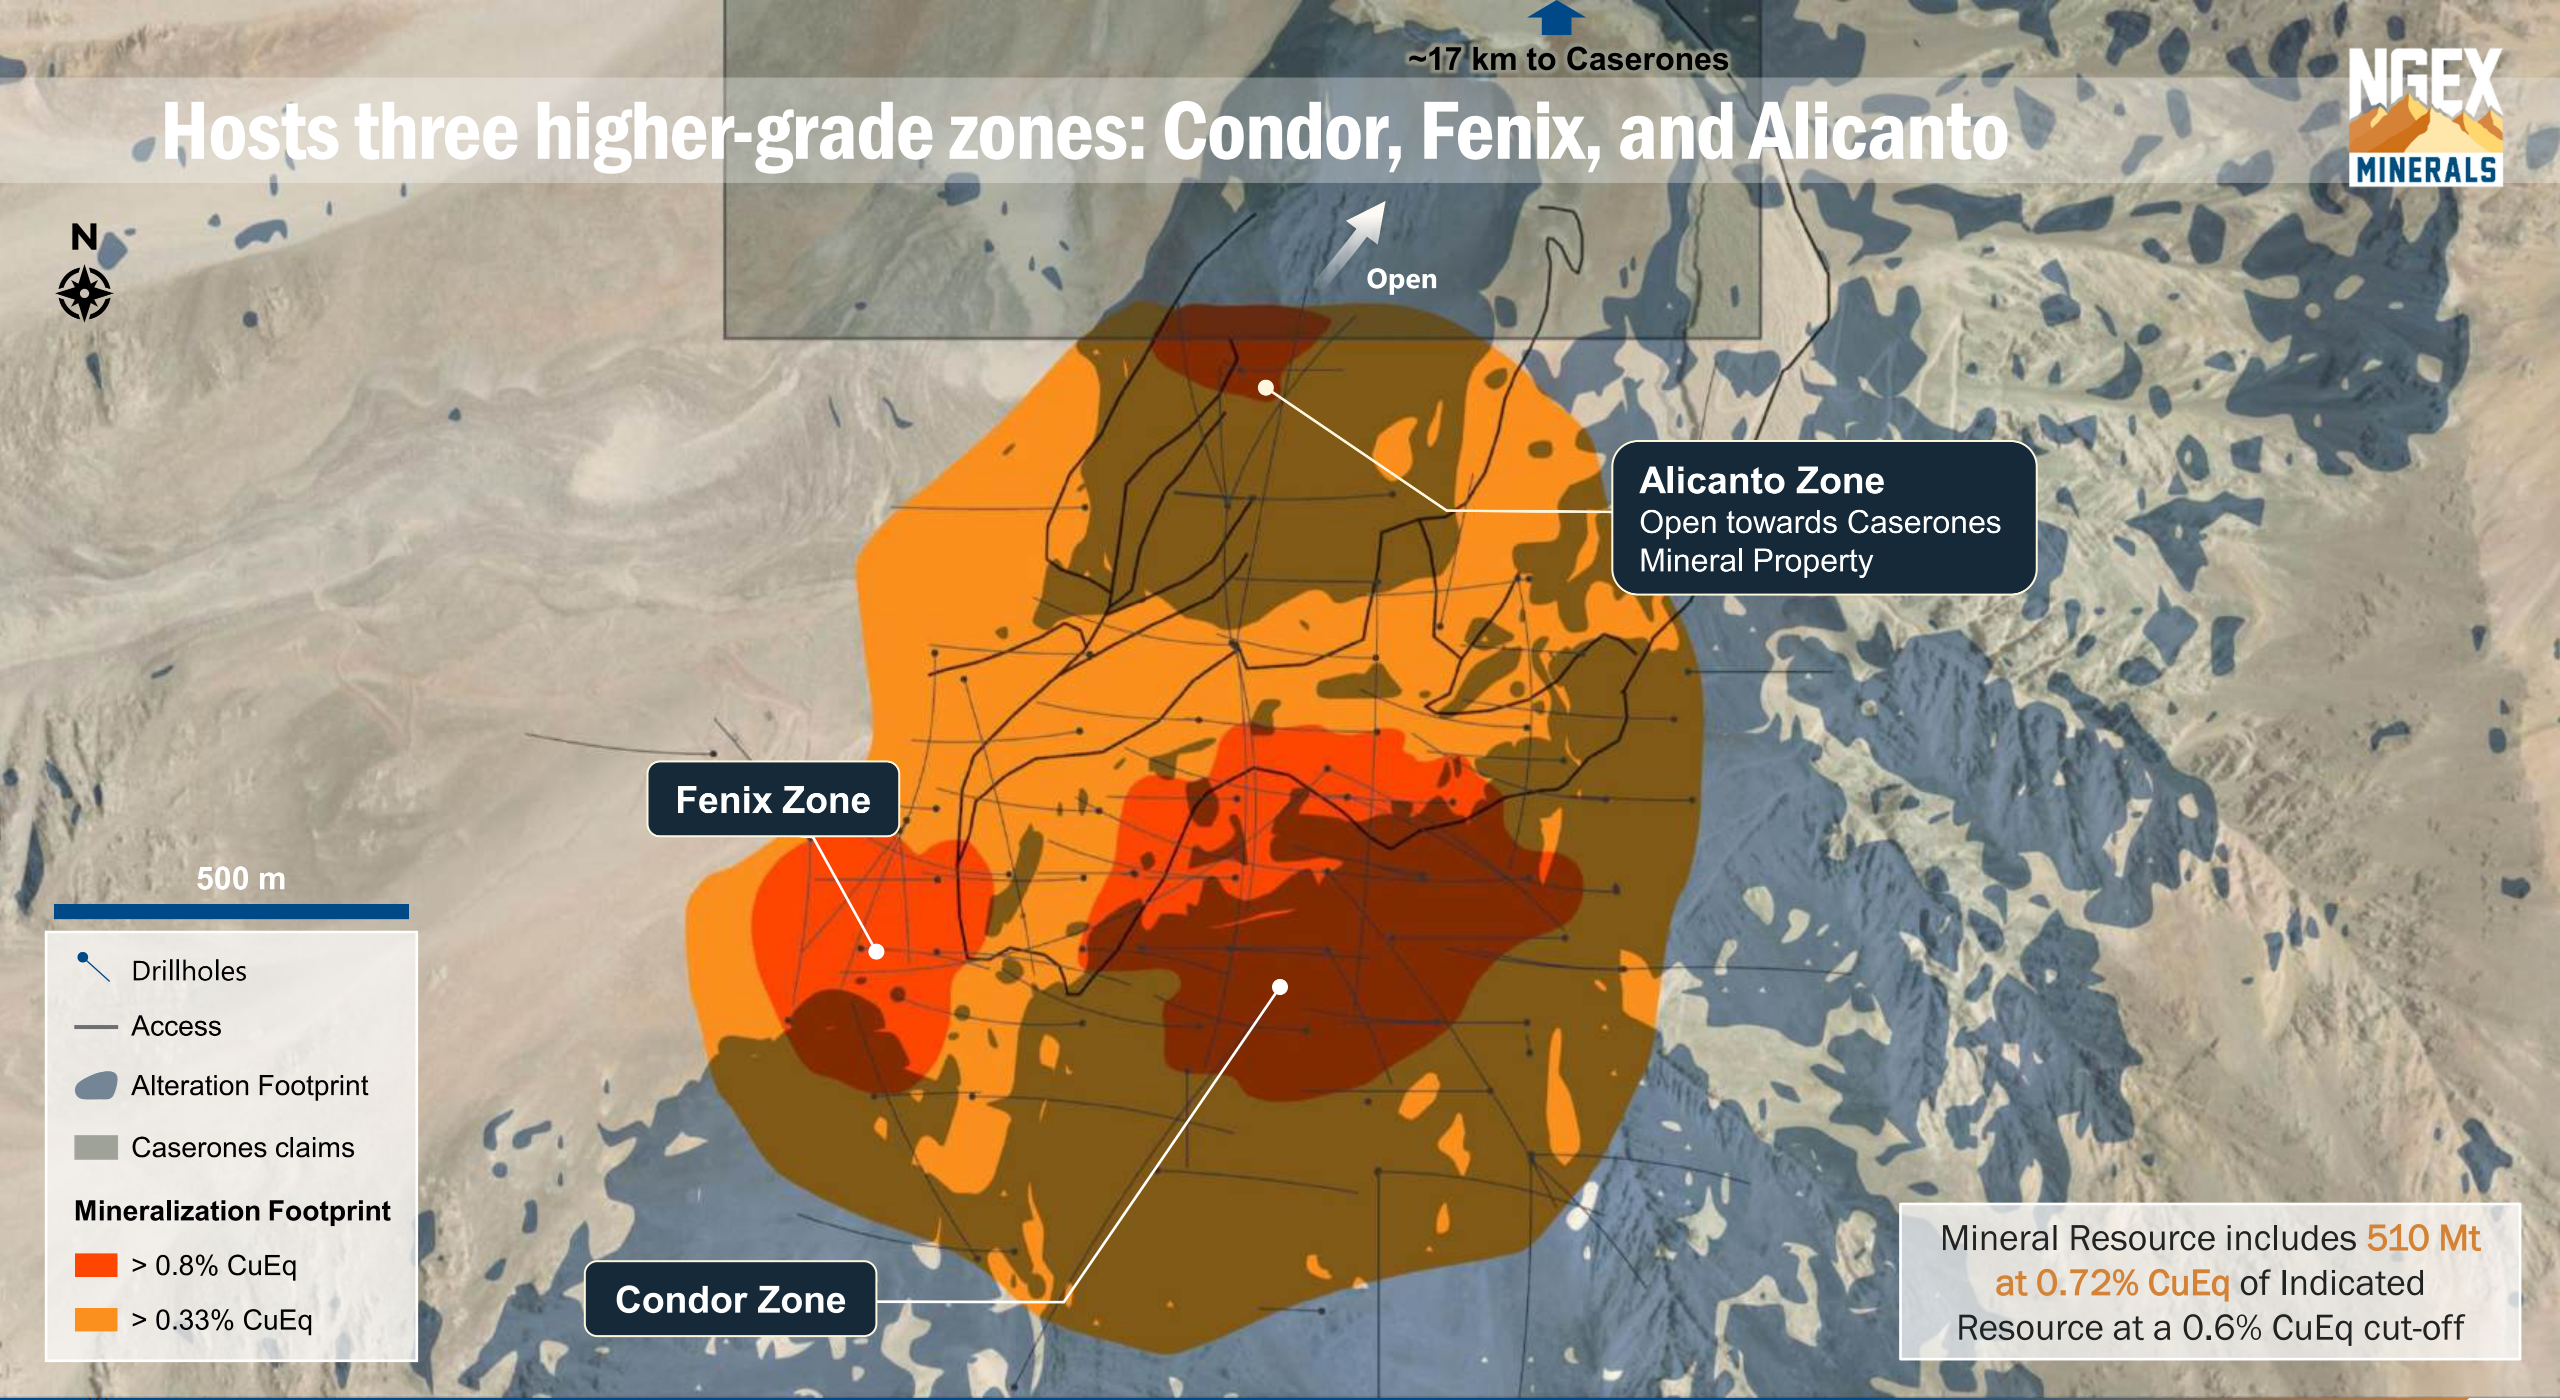
(1) Refer to slide 40 for copper equivalent ("CuEq") formula and additional details regarding the reporting of the Los Helados resources statement

Located 17km from Lundin Mining's Caserones Mine in Region III, Chile

Lundin Mining owns a ~31% minority stake in Los Helados

Multiple options for future development through leveraging existing infrastructure at Caserones

Hosts three higher-grade zones: Condor, Fenix, and Alicanto



Mineral Resource includes 510 Mt at 0.72% CuEq of Indicated Resource at a 0.6% CuEq cut-off

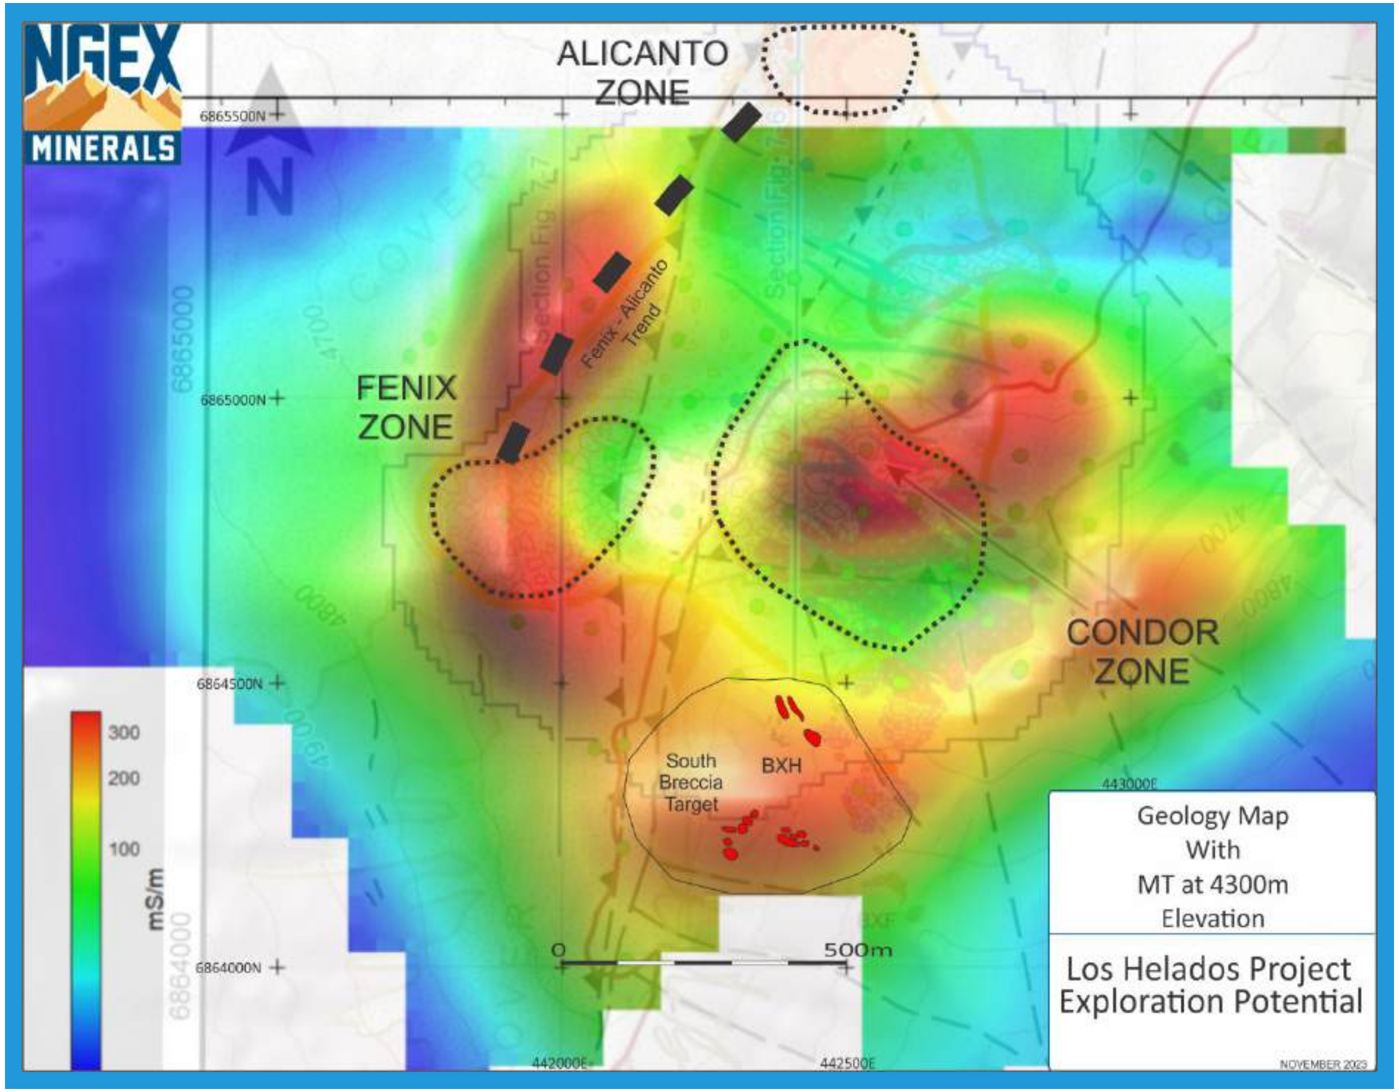
Significant exploration upside remains at Los Helados

A number of high potential targets identified and untested

Two high-quality exploration targets developed:

- **Fenix – Alicanto Trend:** Potential link between Fenix and Alicanto zones
- **South Breccia Target:** Low resistivity anomaly underlying surface breccia outcrops geologically similar to Fenix and Alicanto mineralization

Alicanto zone open to north onto Caserones ground



LunR Royalties | Potential future source of funding for Lunahuasi

LunR is a valuable asset that could eventually be monetized

Could help to fund a potential stand-alone development of Lunahuasi

LUNR ROYALTIES

- NGEx owns **13,370,107 shares**
- Spun-out of NGEx to capture value in the mining royalty and streaming space by building a concentrated portfolio of high-quality royalty and streaming interests
- Poised to become the sixth-largest precious metals royalty and streaming company by market cap

LunR's current portfolio

Fruta del Norte
Ecuador | Producing

Lunahuasi
Argentina | Exploration/Development

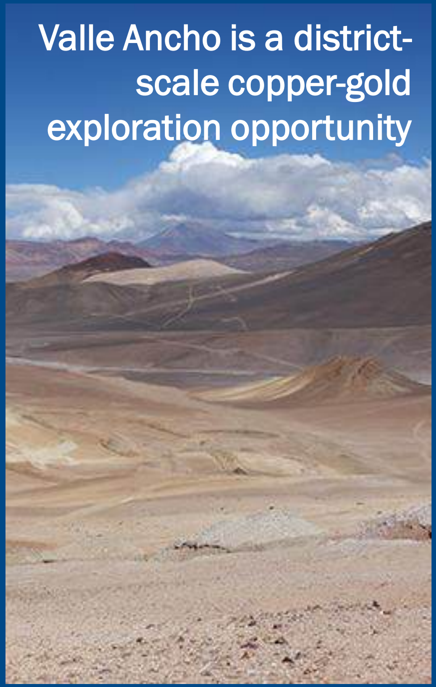
Los Helados
Chile | Exploration/Development

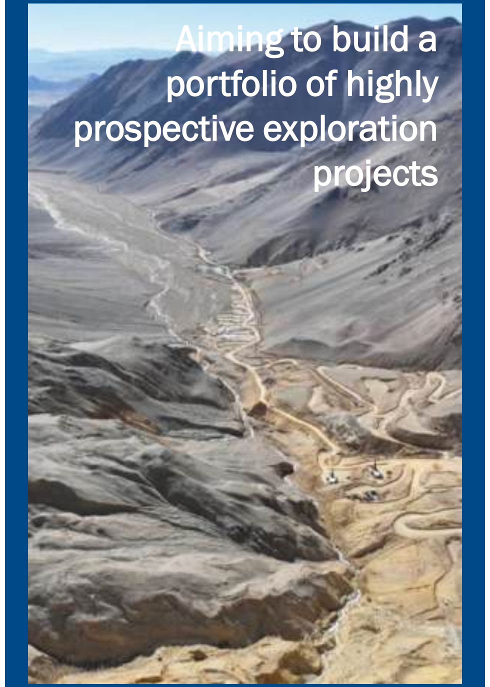
Note: For more details about LunR Royalties see https://www.lunrroyalties.com; For more details on the Lundin Mining-JX transaction Lundin Mining | News

Valiente Resources | The Lundin Group's new exploration vehicle

Valiente Resources is the Lundin Group's new exploration vehicle

A pure play South American exploration vehicle with an intention to grow

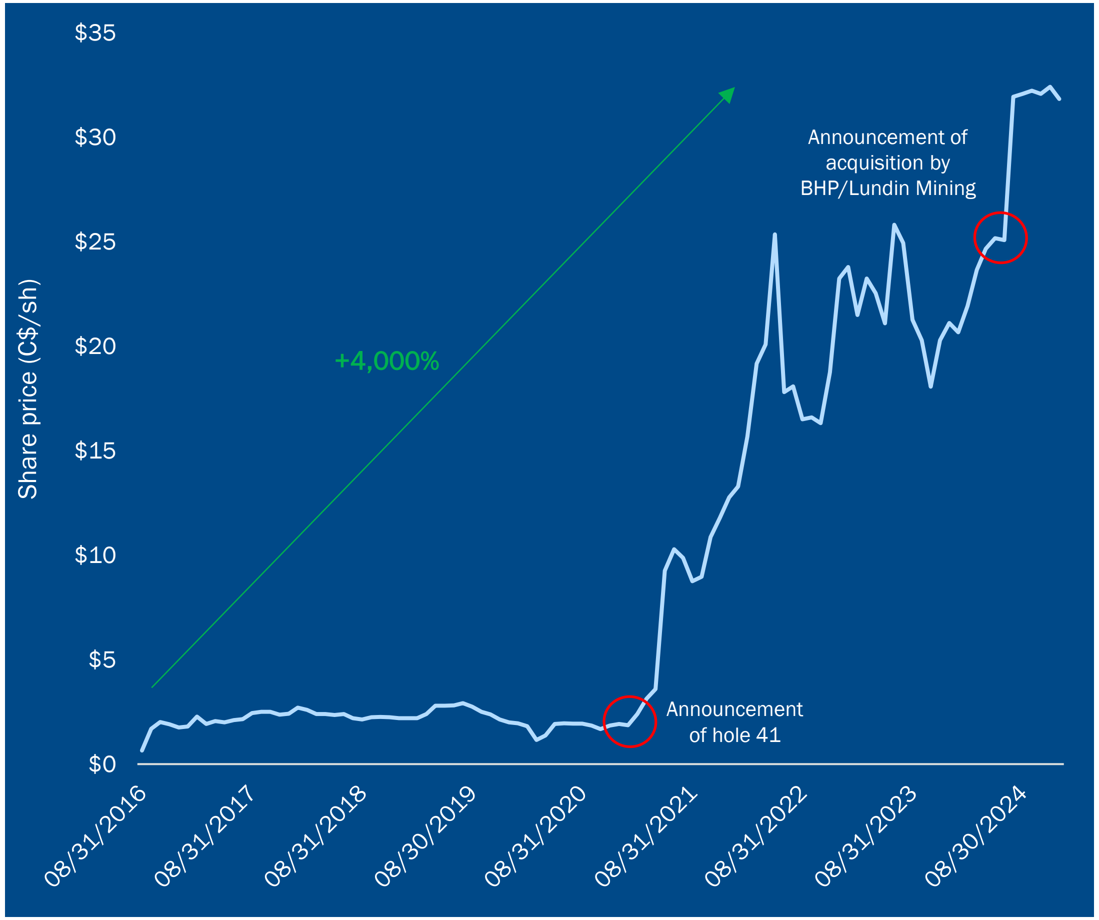




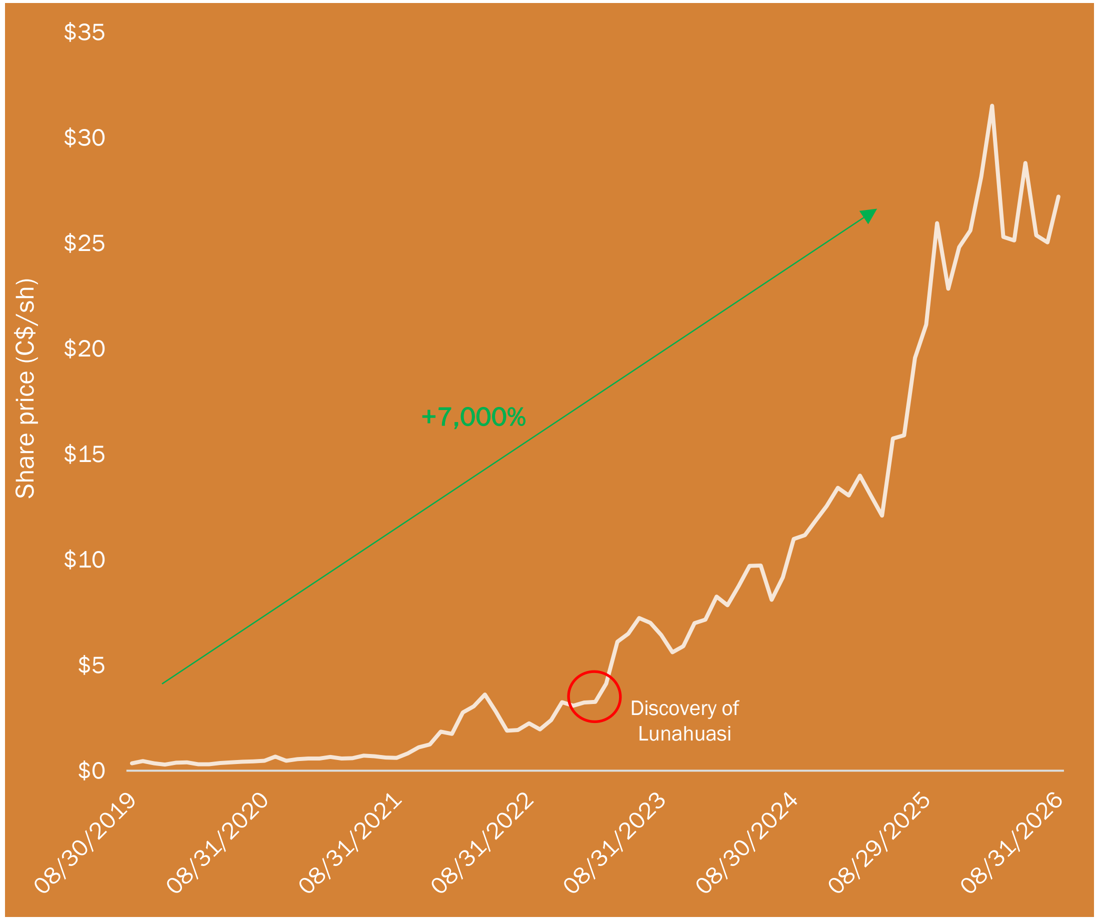
Successful exploration can generate significant shareholder returns

World class discoveries generate significant value

Filo Corp



NGEx Minerals



Valle Ancho will be the foundational piece of Valiente Resources

Highly prospective copper-gold project in Catamarca Province, Argentina

Snapshot

Ownership: 100% owned by NGEx

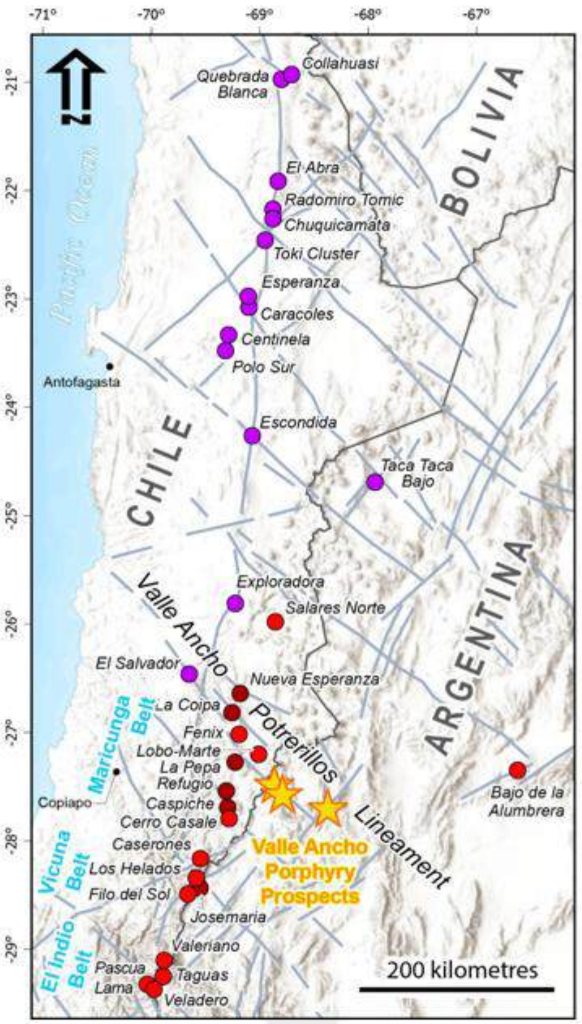
Location: Underexplored 100,000 hectare land package on the Argentina side of the Maricunga Gold Belt

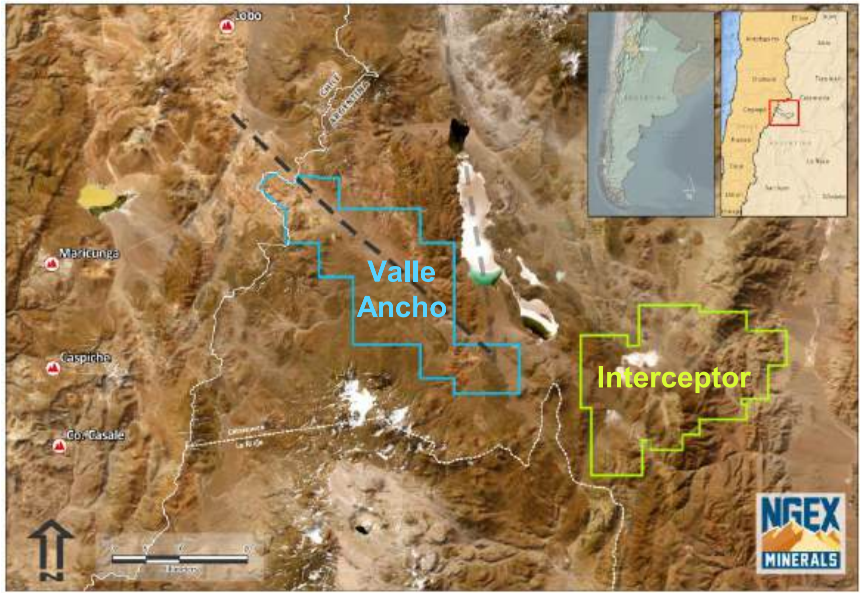
- Located ~40 km from the Norte Abierto and Maricunga gold projects
- Prolific Maricunga Gold Belt contains over 100 Moz gold on the Chilean side

History: No meaningful exploration work completed for nearly 20 years prior to NGEx acquiring the project in 2019

Drilling: NGEx completed 3,060m scout drill program in 2022. Results demonstrated occurrence of significant porphyry mineralization

Future plans: Multiple drill ready targets





Several high potential targets already identified

Over an area similar in size to the Vicuna District

Initial targets identified:

- La Quebrada – porphyry target
- Nordin and 3N – oxide gold target
- La Austral – gold silicified breccias
- Interceptor – porphyry target
- Los Aparejos – copper-gold skarn

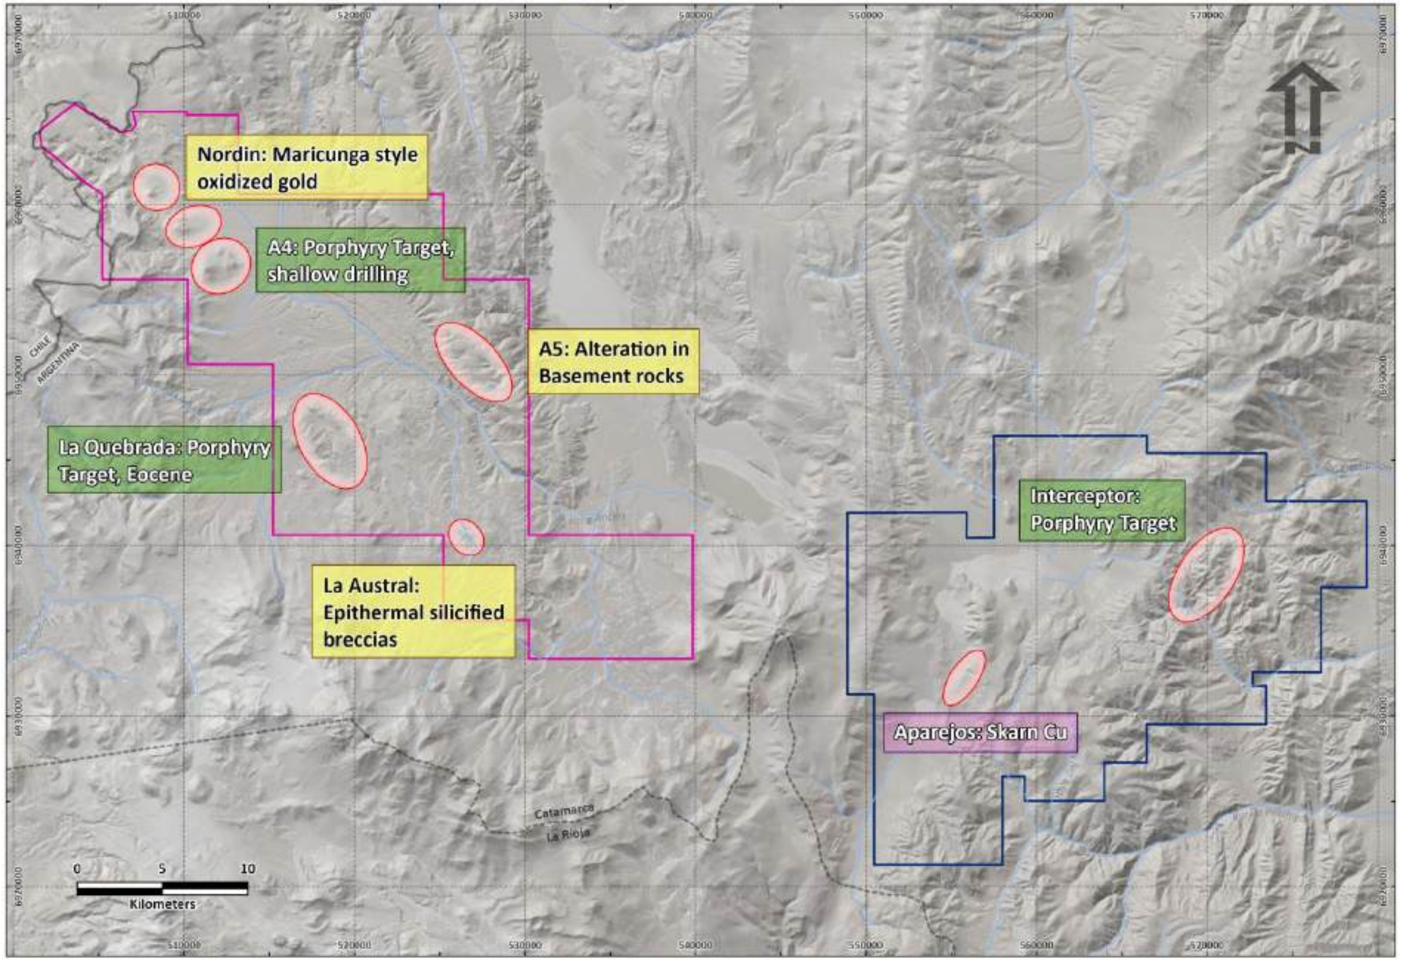
Selected drill results:

La Quebrada Copper-Gold Target:

- VADH003: 596m of 0.50% CuEq (0.23% Cu; 0.37 g/t Au; 1.4 g/t Ag); **including** 104m of 0.62% CuEq (0.25% Cu; 0.50 g/t Au; 1.5 g/t Ag)
- VADH006: 423m of 0.40% CuEq (0.19% Cu; 0.27 g/t Au; 2.2 g/t Ag); **including** 108m of 0.50% CuEq (0.22% Cu; 0.38 g/t Au; 1.9 g/t Ag) **and** 136m of 0.50% CuEq (0.25% Cu; 0.32 g/t Au; 4.2 g/t Ag)

Nordin Oxide Gold Target:

- VAD001: 150m of 1.05 g/t Au
- VAD002: 198m of 0.63 g/t Au; **including** 70m of 0.94 g/t Au



NGEX
MINERALS
Delivering Value | By shortening timeline to production

Significant value generated for shareholders

Lunahuasi is the next chapter in the ongoing story

Track record of value creation through the drill bit

NGEX RESOURCES INC

2016 — FILO MINING (SOLD)

NGEX MINERALS

2019 — JOSEMARIA (SOLD)

2025 — LUNR ROYALTIES

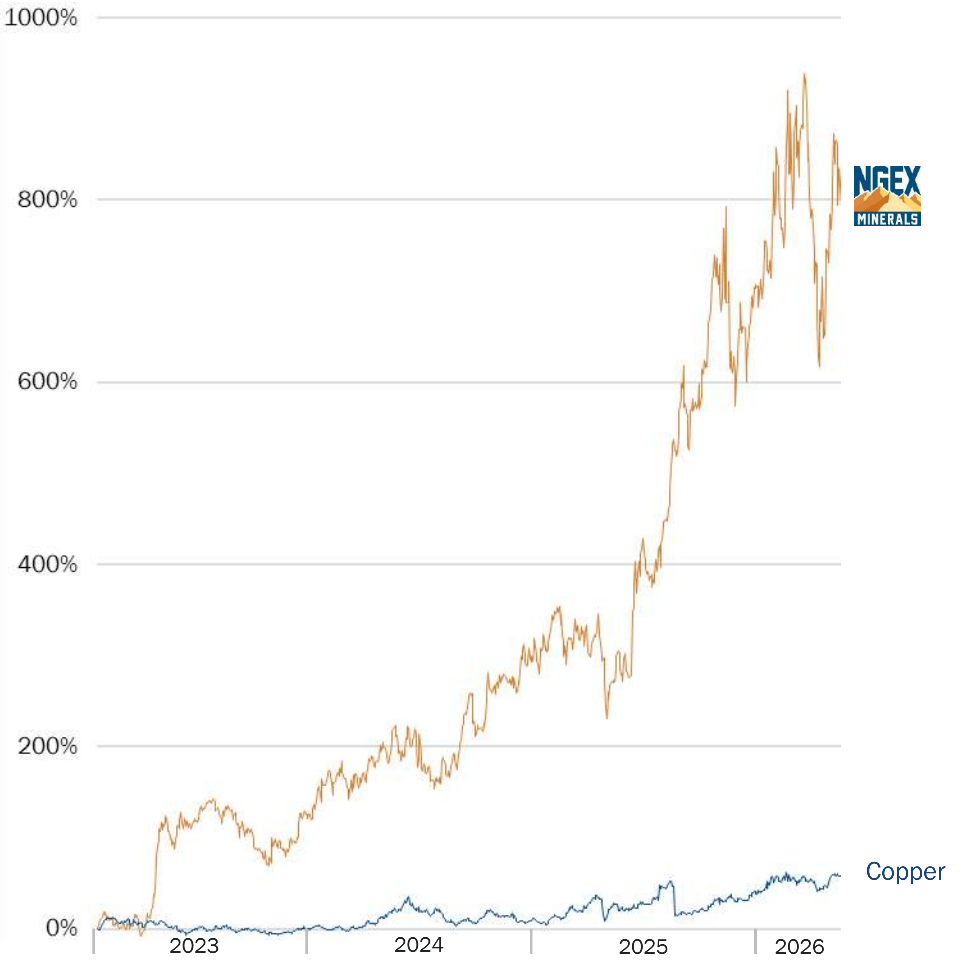
Market Cap
~$40million

3 early stage exploration projects in the (future) Vicuna District

Market Cap
~$13billion

Lunahuasi | Los Helados | Valle Ancho

Share price has outperformed copper



… and there is further unrealized value to be unlocked

Develop comprehensive plan to explore, finance, and eventually build a new high-grade copper-gold-silver mine

Expand Lunahuasi - Phase 5 drill program being planned

Construct exploration adit

Advance stand-alone development of Lunahuasi

Valiente Resources is another opportunity to generate value for NGEx shareholders

Explore RIGI application

Consider options to monetize Los Helados and LunR stakes if appropriate

Stay flexible, focus on value creation

LEVERAGE TO COPPER, GOLD & SILVER PRICES WITHOUT OPERATING RISK

Appendix

Corporate snapshot

Key Leadership

Dr. Wojtek Wodzicki
President, CEO & Director
- CEO of NGEx since inception in 2009
- Holds a doctorate in Geosciences & has 30+ years of experience in mineral exploration
- Led discovery teams for multiple discoveries in the Vicuña district including Lunahuasi, Los Helados, Filo del Sol, and Josemaria

Bob Carmichael
VP Exploration
- Professional geological engineer with over 30 years of international mineral exploration
- Previously VP Exploration at Filo Corp until 2025 acquisition by BHP/Lundin Mining

Arndt Brettschneider
VP Operations & Projects
- 30 years of international mining, project development and consulting experience.
- Prior to joining the Lundin Group of Companies in 2019, was Vice President of mining consulting businesses at two global engineering companies.

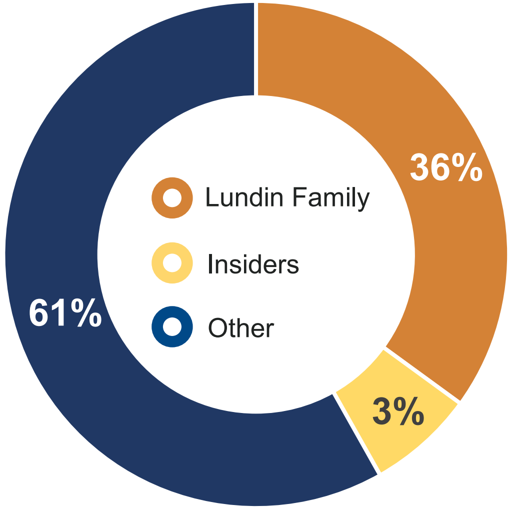
Shareholder Summary

% based on FDITM shares



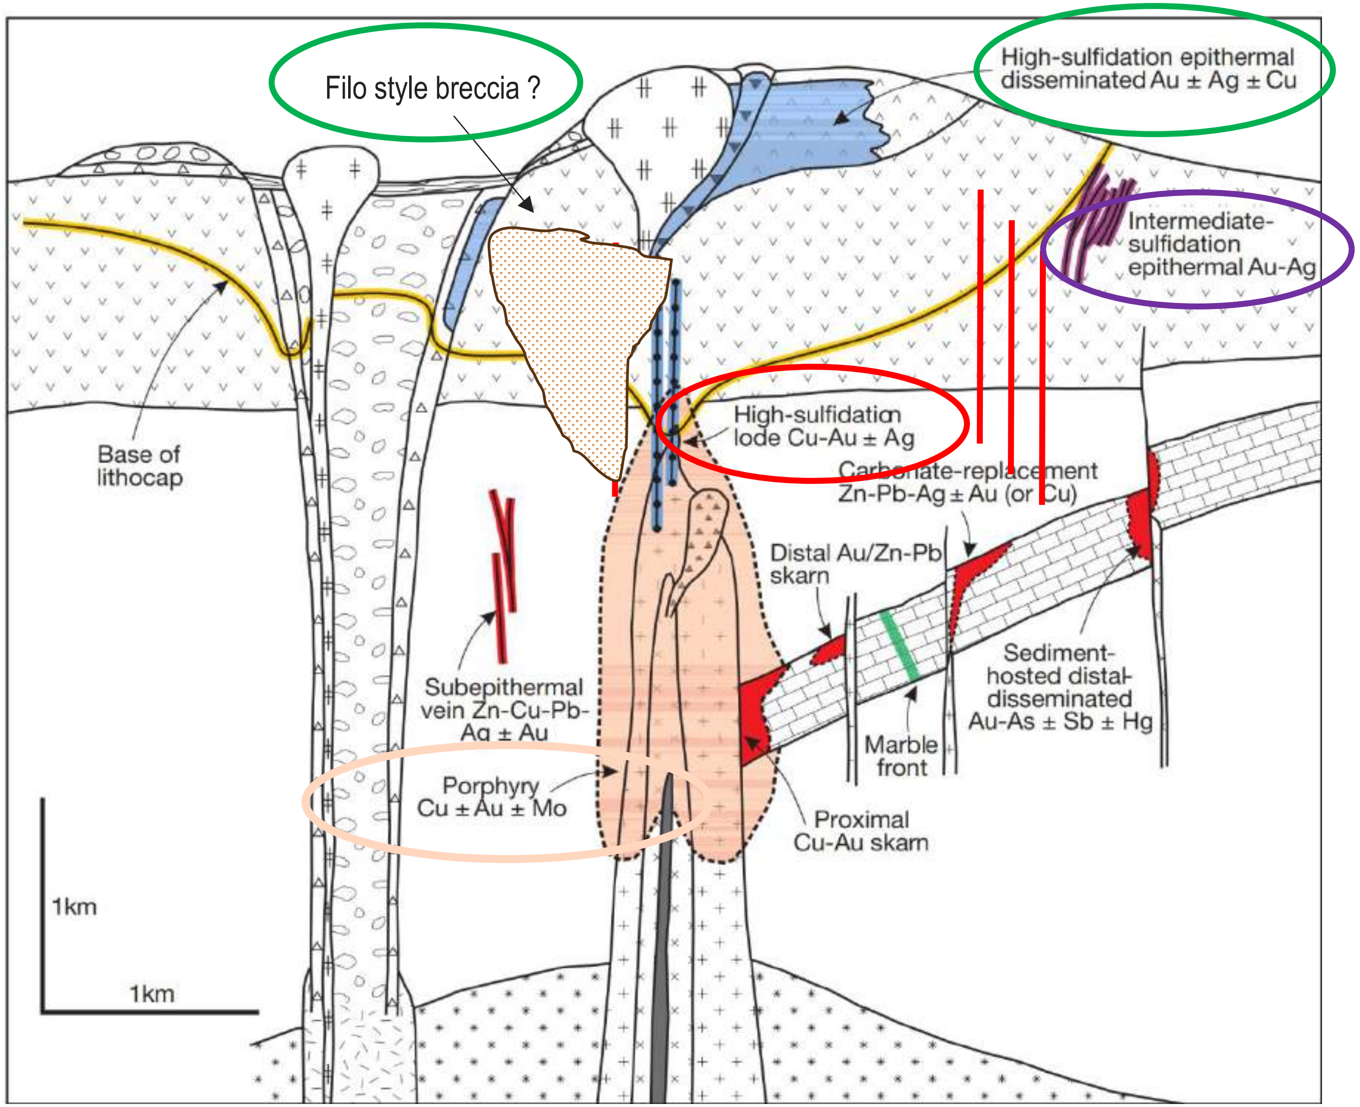
Experienced Exploration-Focused Leadership with Significant Insider Ownership

(1) Weighted average price of C$3.455 (2) Includes short term investments

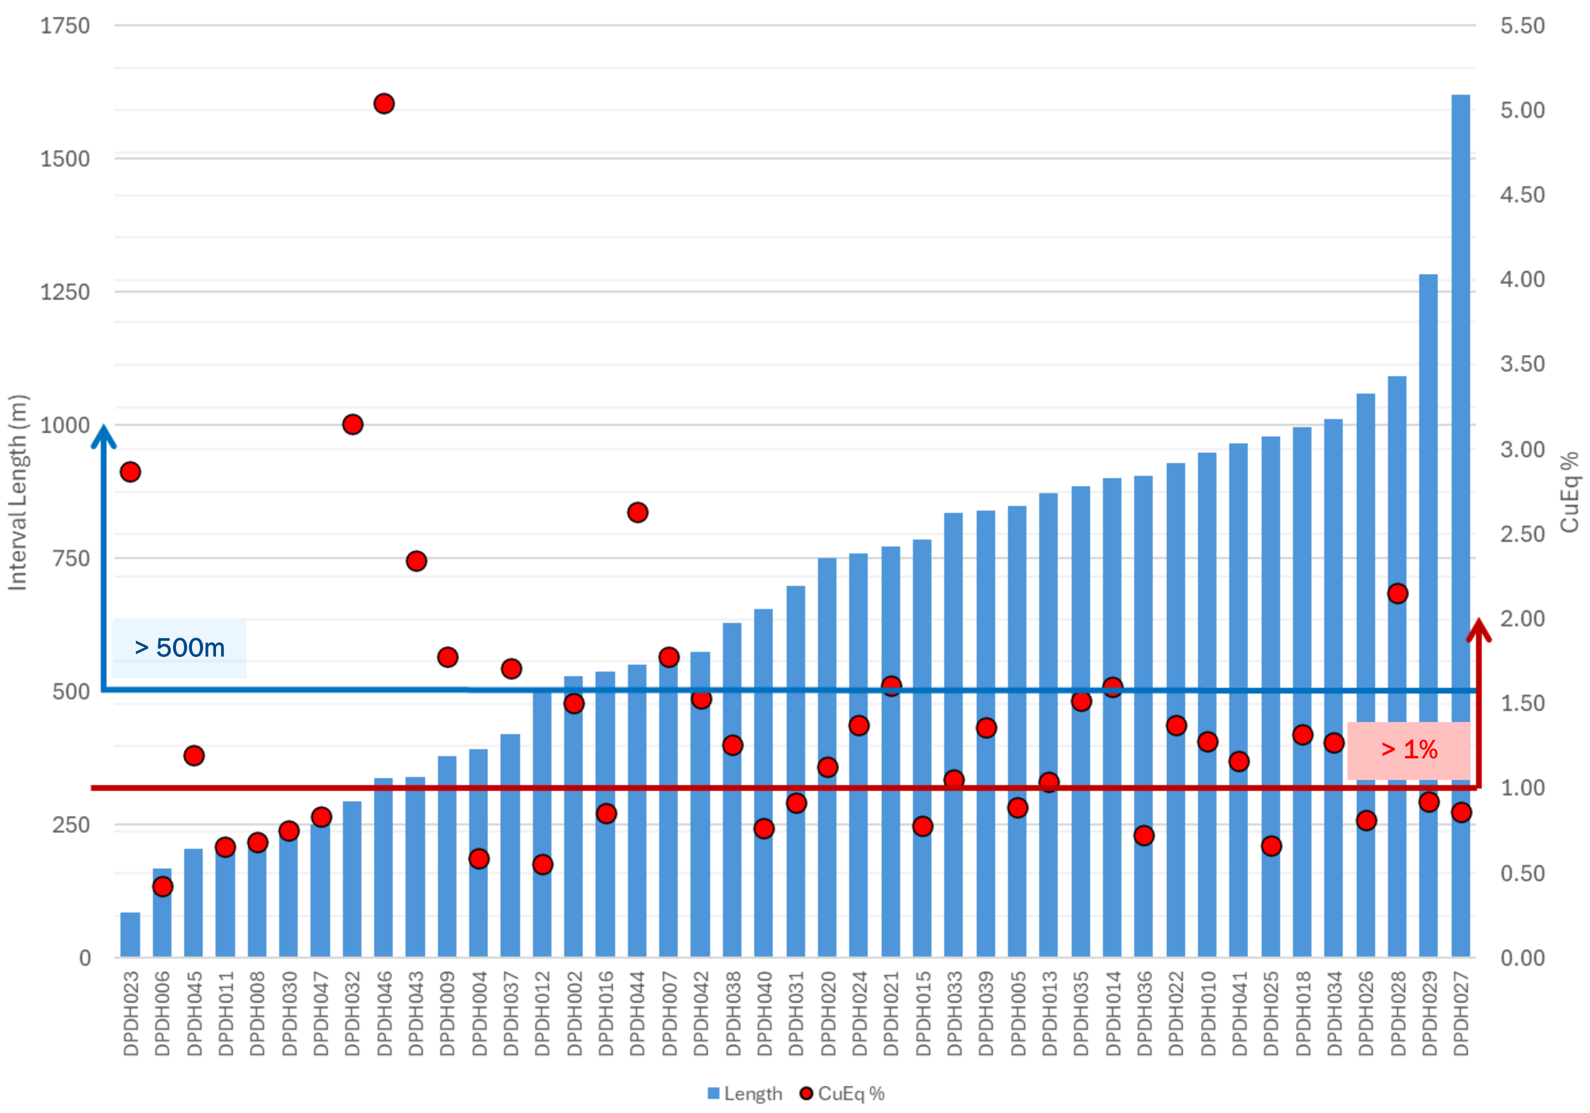
Lunahuasi is part of a porphyry copper system

Giant systems with multiple styles of mineralization

- 4 mineralization styles discovered to date at Lunahuasi
  - High-sulphidation Cu-Au-Ag veins
  - Intermediate sulphidation epithermal Au quartz veins
  - Disseminated and stockwork high-sulphidation Cu-Au
  - Porphyry Cu-Au
- All unusually high-grade



Long intervals of grades >1% CuEq a common theme at Lunahuasi



26 out of 43 holes average > 1% CuEq

19 of those are > 500m

Almost every hole ends in mineralization

Los Helados – Mineral Resource Statement

Cut-Off (%CuEq)	Category	Tonnes (billions)	Grade				Contained Metal		
			Cu (%)	Au (g/t)	Ag (g/t)	CuEq (%)	Cu (Blbs)	Au (Moz)	Ag (Moz)
0.25%	Indicated	2.39	0.38	0.15	1.4	0.49	19.9	11.3	106.6
	Inferred	1.84	0.30	0.10	1.3	0.38	12.2	5.8	75.4
0.33%	**Indicated**	**2.08**	**0.40**	**0.15**	**1.5**	**0.51**	**18.4**	**10.2**	**97.5**
	Inferred	**1.08**	**0.34**	**0.10**	**1.4**	**0.42**	**8.2**	**3.6**	**50.2**
0.60%	Indicated	0.51	0.56	0.21	1.8	0.72	6.3	3.5	30.2
	Inferred	0.04	0.62	0.09	2.4	0.70	0.6	0.1	3.4

Notes:
1. Mineral Resource prepared in accordance with CIM (2014) definitions
2. All dollar amounts are presented in U.S. dollars
3. Mineral Resources are estimated at a cut-off grade of 0.33% CuEq based on an underground block cave mining cost of \$8.00/t, a processing cost of \$12.00/t, and a general & administrative cost of \$1.00/t
4. Mineral Resources are estimated using a copper price of \$3.90/lb, a gold price of \$1,800/oz, and a silver price of \$20/oz
5. Metallurgical recoveries used for the CuEq calculation correspond to three geometallurgical zones, defined by depth below surface:
   a) Upper: Cu 83.1%, Au 72.8%, Ag 31.0%
   b) Intermediate: Cu 90.2%, Au 80.3%, Ag 54.9%
   c) Deep: Cu 93.1%, Au 82.5%, Ag 70.5%
6. The formulas used for the CuEq calculation are:
   a) Upper: CuEq % = Cu % + (0.681008 x Au (g/t)) + (0.002989 x Ag (g/t))
   b) Intermediate: CuEq % = Cu % + (0.692039 x Au (g/t)) + (0.004877 x Ag (g/t))
   c) Deep: CuEq % = Cu % + (0.688852 x Au (g/t)) + (0.006068 x Ag (g/t))
7. Bulk density is 2.67 t/m^3
8. Mineral Resources are reported within an optimized underground block cave mining shape to demonstrate reasonable prospects for eventual economic extraction (RPEEE). The block cave considered a column size of 20m x 20m x (≥ 80m)
9. There are 40 Mt of unclassified material excluded from inside the base case block cave shape
10. Cut-off grades refer to diluted cut-off grades used to generate the corresponding block cave shapes. For each cut-off grade, the tonnes and grade represent the total Indicated or Inferred material within each of these shapes
11. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability
12. Numbers may not add due to rounding
13. "Technical Report on the Los Helados and Lunahuasi Projects, Chile and Argentina" dated December 13, 2023 (effective date October 31, 2023), which incorporates the mineral resources statement for Los Helados is available on the Company's website and SEDAR+.

NGEx's Sustainability Strategy Framework

To responsibly develop Los Helados and Lunahuasi, two significant copper assets whose development will help power the green economy, creating lasting value for our stakeholders and contributing to a sustainable future

Responsible Resource Development

We uphold ethical governance and business practices that drive responsible decision-making and long-term success

16 PEACE, JUSTICE AND STRONG INSTITUTIONS
1 NO POVERTY
7 AFFORDABLE AND CLEAN ENERGY
8 DECENT WORK AND ECONOMIC GROWTH
9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

Strong Workforce & Communities

We prioritize the safety and wellbeing of our workforce and cultivate strong relationships with local communities

3 GOOD HEALTH AND WELL-BEING
5 GENDER EQUALITY
10 REDUCED INEQUALITIES
11 SUSTAINABLE CITIES AND COMMUNITIES

Environmental Stewardship

We integrate sustainable practices and technologies to minimize our environmental impact wherever possible

6 CLEAN WATER AND SANITATION
12 RESPONSIBLE CONSUMPTION AND PRODUCTION
13 CLIMATE ACTION

See Sustainability - NGEx Minerals.com for more details and to download our Sustainability Report
